

YEAR 3 COMPUTING, NETWORK EXPLORER

The main app for this project will be [Adobe Spark Video](#)

Key Vocabulary:

1. Computer network - A collection of computers and devices connected together to share resources and information.
2. Internet - A global network that connects computers and provides access to information and communication services.
3. Web browser - A software application used to access and view websites on the internet.
4. Website - A collection of web pages and related content accessible through a URL.
5. URL (Uniform Resource Locator) - The address used to identify a website or resource on the internet.
6. Search engine - A tool used to search for information on the internet by entering keywords or phrases.

1. Pupils take part in a hands-on **unplugged activity** to build the knowledge and understanding relating to the learning objective

2. Pupils use an information technology/digital literacy tool to share what they have learnt

So in this unit, pupils:

Become 'Network Explorers' for the unplugged activity

Create an **Adobe Spark Video** about what they discover using the **DARES** approach.

Quiz:

1. What is a computer network?
2. What is a web browser used for?
3. How do you use search engines effectively?
4. How do you stay safe online?
5. What information is okay to share online?
6. How can you be a digital citizen?
