

YEAR 3 PSHCE, CARING FOR THE ENVIRONMENT

Key words

Environmental issues- effects of human activity on the environment, most often of which are harmful effects.

Deforestation- the action of clearing a wide area of trees.

Forestry Renewal- The act of growing back the forest by natural or artificial means after harvesting trees.

Endangered- (of a species) seriously at risk of extinction.

Habitats- the natural home or environment of an animal, plant, or other organism.

Oxygen- a colourless, odourless reactive gas. Oxygen is produced and released by the tree.

what we should do to save trees?

- Avoid printing more paper.
- Stop using wooden decorative
- Plant trees/ shrubs
- Gift plants on your friend's birthday.
- Stop making disposable chop sticks(china)
- Use brown paper bags for lunches
- Don't keep paper towels in your house
- Adopt a Tree
