

YEAR 2 PSHCE: LIVING IN THE WIDER WORLD

What should I already know?

- What plastic is.
- What rubbish is.
- What lives in the sea.

What will I know by the end of the unit?

What is pollution?	Pollution is rubbish that makes our environment dirty. It harms our environment.
What is plastic pollution?	Plastic that has been used and thrown away.
How is plastic pollution affecting animals that live under the sea?	• The animals are eating the plastic and it is killing them.
Different places affected by plastic pollution.	• Indonesia – sea of plastic • Plastic island- Pacific Ocean • Our oceans and seas.
What can we do about it?	• Recycle, use plastic alternatives. Make the right choices. • Create other uses for the empty plastic containers.

Investigate

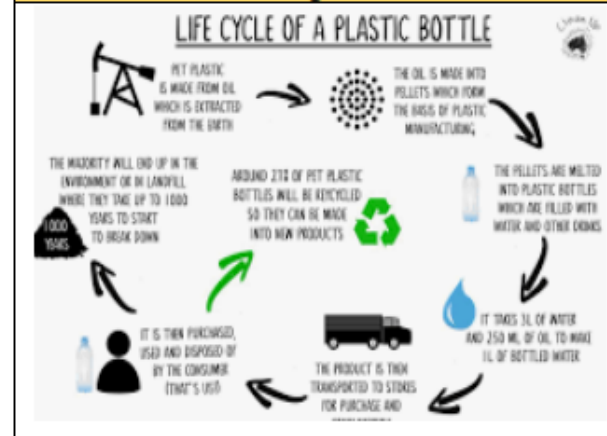

Investigate

Put plastic and a piece of fruit in soil and watch to see the decomposition.

Research the different things we can make with a bottle.

Pick up litter in the playground

Diagram
